

GP ORGANIC

Absorbent GP products and Spill Sorb make up ISC's range of Organic General Purpose Absorbents. These products are designed to clean up liquids ranging from oil and solvents to water and non-aggressive chemicals. They are manufactured from 100% cellulose fibres made from pulp re-claimed from the manufacture of paper products. Liquids are locked into the cellulose fibres, preventing the leaching and handling problems commonly associated with clay and polypropylene sorbents. They provide the broadest possible range of disposal options, including incineration, landfilling and bioremediation. The performance attributes of ISC's range of Organic General Purpose sorbents make them stand-out performers in spill control.

FEATURES

- Absorb liquids within fibres vs. adsorbing liquids on exterior of fibres only
- Absorb immediately on contact
- Retain the liquids absorbed; prevents leaching of absorbed liquids
- Absorb all liquids except strong inorganic acids and caustics
- Anti-static
- No free silica avoids health problems (silicosis) associated with clay and diatomaceous earth
- Tough - won't rip easily and can withstand forklift and foot traffic
- Separate into wipes for hands, machinery and work area clean up
- Lint free and non-abrasive to machinery
- 100% organic - environmentally friendly
- Increased options for disposal
- Landfill - pass and exceed Toxicity Characteristic Leaching Procedure (TCLP), Paint Filter Test and Liquid Release Test (LRT) - won't leach absorbed liquids, eliminates free liquids problems
- Incinerate at low temperatures (industrial boilers, etc.)
- Bioremediation- will break down to natural organic elements with the use of microbial enzyme action
- Environmentally responsible from origin to disposal

ABSORBENT GP PADS AND ROLLS

Absorbent GP Natural Fibre Pads and Rolls provide high performance spill control for both day-to-day and emergency applications. The 4 ply construction of Absorbent GP Pads allows them to be used for high volume spills in 4 ply or to be separated into a single ply for small leaks and drips or cleaning parts. Absorbed liquids are captured and won't leach allowing pads to be used until they are at absorption capacity. Absorbent GP Rolls offer the same 4 ply construction and are a practical option for spills, leaks and drips over large areas on workshop floors.

GP ORGANIC

SPILL-SORB PARTICULATE

Spill-Sorb is a general purpose particulate, designed specifically as an environmental alternative to Kitty Litter. It contains, controls and cleans up unwanted liquid spills and removes sheen from floors and work surfaces. Spill-Sorb is manufactured from 100% reclaimed cellulose fibres and locks absorbed liquids into the cellulose fibres, preventing the leaching and handling problems commonly associated with rags, sawdust, clay and diatomaceous earth. Spill-Sorb offers a number of advantages over most other particulates:

- Light weight increases ease and speed of deployment and clean-up!
- High performance on rough surfaces!
- Natural fire retardancy!
- Non-abrasive!
- Passes TCLP and liquid release tests and is suitable for disposal via landfill if used for oily waste (always contact local authorities for regulations in your local jurisdiction)
- Spill-Sorb's cellulose fibres contain no respirable crystalline silica dust (a known cause of silicosis and a carcinogen) which is associated with most mineral sorbents

ORGANIC SOCKS AND PILLOWS

Absorbent GP Socks are primarily used to contain spills by restricting their spread. They can also be placed in crevices or tight gaps where there has been a spill. As a preventative measure socks can be wrapped around machinery that may be leaking or dripping during normal operations. Absorbent GP Pillows are used to absorb high volumes of spilled liquid once a spill has been contained. They can also be used to catch liquids while performing maintenance on machinery.

Item #	Product	Description	Unit
40032	Spill-Sorb	28L	Bag
34602	Pads	41cm x 51cm x 6mm	Bale of 100
36634	Rolls	80cm x 46m x 6mm	Roll
42011	Pillows	25cm x 45cm	Box of 20
42012	Pillows	45cm x 45cm	Box of 10
33032	Socks	75mm x 1.2m	Box of 10
33033	Socks	75mm x 3m	Box of 6
